Juan Pablo Guzmán Mayo

Nationality: Mexican

Email: juandxce@gmail.com
Linkedin: linkedin.com/in/juandxce
Github: github.com/juandxce
Mobile: (+52) 5571276691
PORTFOLIO: juandxce portfolio

SKILLS:

I'm comfortable (and enjoy working with) with:
- Javascript (ES6)

- React.js
- Angular (2-5)
- ionic framework (2-4)
- Bootstrap
- Material UI
- Ant design
- Responsive Web Design
- Redux
- HTML
- CSS/SASS
- Firebase
- Google Cloud Platform
- Nodejs
- Express
- GraphQL (Apollo)

- Non relational databases (PouchDB, CouchDB, Mongodb, firestore)

And know:

- Angularjs
- JQuery
- (some) SQL (MySQL)
- (some) PHP

PERSONAL STATEMENT

I'm the one that's always excited to learn something new, dive deep to become great at it and use it to solve new and challenging problems. If that's something that you're looking for, I'm a good fit. Javascript is the programming language that I'm most passionate about, I love it's flexibility and made myself an expert on it.

WORK EXPERIENCE

May 2019 – Current job – Frontend developer at Nearsoft Inc.

Work with US clients such as **SIEMENS** and **EOG Resources** to help them achieve their development needs.

November 2018 – May 2019 – Frontend developer at Anzen Digital

Productive since my first week on a new project, with a new framework, new coworkers and was still able to manage my way through it, and even contribute with new and fresh ideas about improving the application (the P.O. and J.O. loved them and are now being implemented by me).

My activities: Develop the frontend side of a hybrid application for city group, mostly developing the UI, wiring microservices and improving the performance of an important part of the app (banking).

September 2017 – November 2018 – Frontend developer at M22

Frontend lead of a small team at M22, a marketing/development agency.

My highlight here is that my strong JS skills were essential for the project's success. After half a year of being together M22 gave me a small team of 2 devs to lead and bring the projects alive. While I was there we grew from 8 to 36 members and, as other companies loved our work, M22 gained popularity (partially because of what I did behind the scenes and I'm really proud of it).

I developed engaging user interfaces from wireframes/designs to fulfill our client needs. Managed the project frontend architecture, gave monthly demos to clients, participated in status meetings, raised and estimated project requirements and integrated new functionalities to already developed sites.

September 2016 – Nov 2018 – Autonomous frontend Developer

Converted PSD files to HTML responsive templates. I have a portfolio that got me my first on-site job at M22, however by no means I'm proud of it and it hasn't been updated since 2017.

Hybrid app to control the sales process at https://www.lomelin.mx/

INTERESTS

Fitness: A healthy body is the complement to a healthy mind. I love going to the gym as it relieves daily life stress.

Programming: This is what I do in my spare time, my passion.

EDUCATION

2017 - Current

UNAM - Lic. en Informática
